## Sudoku

Every row, every column and each of the nine smaller boxes of nine squares should be filled with a different number from 1 to 9 inclusive.

Some numbers are already in place. Can you complete the grid?

2		6	5	9				3
	3				2	4		7
					3		6	
8		3			6	7		1
	9			1			2	
1		5	4			9		8
	4		8					
6		8	7				5	
9				3	1	6		4

# IQ Puzzle

A standard set of twenty-eight dominoes has been laid out as shown.

Can you draw in the edges of them all? The check-box is provided as an aid, so that you can see which dominoes have been located.

0-0	0-1	0-2	0-3	0-4	0-5	0-6

1-1	1-2	1-3	1-4	1-5	1-6	2-2

2-3	2-4	2-5	2-6	3-3	3-4	3-5

3-6	4-4	4-5	4-6	5-5	5-6	6-6

## Crossword

## Across

- 1 Eastern marketplace (6)
- 5 Nepalese soldier (6)
- 8 \_\_\_\_ *Karenina*, novel (4)
- 9 Fervent proponent (6)
- 10 Birthstone for November (5)
- 11 Small area of land (4)
- 12 Performance using gestures (4)
- 13 Light-sensitive membrane (6)
- 15 Stiff paper (4)
- 17 Grandeur (4)
- 19 Shelter from danger (6)
- 20 Vocal music (4)
- 21 Medium to dark tan colour (4)
- 22 Darkest part of a shadow (5)
- 24 Existing alone (6)
- 25 Brood (4)
- 26 Recognition (6)
- 27 Want strongly (6)

## Down

- 2 Memory loss (7)
- 3 Semi-precious stone (5)
- 4 Rear (4)

- 15 Creation of the highest excellence (7)
- 16 Pulled (7)
- 18 Scarf worn around the neck (7)
- 21 Groundwork (5)
- 23 Group of musicians (4)

Codeword

Every letter in this crossword has been replaced by a number, the number remaining the same for that letter wherever it occurs in the grid. Can you substitute numbers for letters and thus complete the crossword? It may help to cross off the letters either side of the grid to keep track of progress, and the reference box showing which numbers have been decoded can also aid solving. Three letters have already been entered into the grid, to help you on your way.

A	1	7	5	19	24	6		20	6	5	21	7	6	24	24	N

## IQ Puzzle

Each of the small squares in the grid below contains either A, B or C. Every row, column and each of the two long diagonals has exactly two of each letter. The information in the clues refers only to the squares in that row or column. To help you solve this problem, we have provided as many clues as we think you will need! Can you tell the letter in each square?

### Across

- 1 No two adjacent squares contain the same letter.
- 2 The As are further right than the Bs.
- 3 The Bs are further right than the As.
- 4 The Cs are further right than the Bs.
- 5 Each A is next to and right of a B.
- 6 No two adjacent squares contain the same letter.

### Down

- 1 The As are somewhere between the Cs.
- 2 The Bs are lower than the Cs.
- 3 Any three adjacent squares contain three different letters.
- 4 The Cs are lower than the Bs.
- 5 The Cs are somewhere between the Bs.
- 6 Each B is next to and below an A.

- 15 Fabric made of silk (7)
- 16 Certify (7)
- 17 Skin on the back part of the neck (6)
- 19 Song used to praise the Deity (5)

The clues to this puzzle appear within the grid. Each blank square should contain a single digit number from 1-9. Every set of numbers across or down has a sum total equal to that of its clue, shown either directly above or directly to the left.

# IQ Puzzle

34

The blank squares below should be filled with whole numbers between 1 and 40 inclusive, any of which may occur more than once, or not at all.

The numbers in every horizontal row add up to the totals on the right, as do the two long diagonal lines; while those in every vertical column add up to the totals along the bottom.

Can you discover the missing numbers?

								163
18	11	18	20		37	19	7	169
19	34		14	8	28	5	8	150
39		34		5		36	25	243
28	38	7	19	21			36	164

## IQ Puzzle

40

Every row and column in this grid originally contained one circle, one diamond, one square, one triangle and two blank squares, although not necessarily in that order.

Every symbol with a black arrow refers to the first of the four symbols encountered when travelling in the direction of the arrow. Every symbol with a white arrow refers to the second of the four symbols encountered in the direction of the arrow.

Can you complete the original grid?

# IQ Puzzle

Can you fill each square in the bottom line with the correct digit?

Every square in the solution contains only one digit from each of the lettered lines above, although two or more squares in the solution may contain the same digit.

At the end of every row is a score, which shows:

- a the number of digits placed in the correct finishing position on the bottom line, as indicated by a tick; and
- b the number of digits which appear on the bottom line, but in a different position, as indicated by a cross.

## SCORE

Logic Puzzle

Four people who called in at the public library this morning each spent a few hours in the reference section, studying various books on a particular subject. At what time did each arrive, for how long did he or she stay and what was the subject of interest to each reader?

- 1 The person interested in butterflies arrived thirty minutes earlier than the person who was keen to gain more knowledge on the history of flags.
- 2 Judy studied several books on coins and stayed in the library for one hour longer than the person interested in politics, who arrived later than Judy.
- 3 Lionel stayed in the library for half an hour longer than Trish who, in turn, stayed in the library for longer than the person who arrived at nine o'clock.

	Arrived				Stayed				Studied

- 17 Oblong cream puff (6)
- 19 Irish capital (6)
- 21 All the time (4)
- 22 Zealous (4)

Kakuro

The clues to this puzzle appear within the grid. Each blank square should contain a single digit number from 1-9. Every set of numbers across or down has a sum total equal to that of its clue, shown either directly above or directly to the left.

# IQ Puzzle

70

Each horizontal row and vertical column should contain different shapes and different numbers.

Every square will contain one number and one shape and no combination may be repeated anywhere else in the puzzle; so, for instance, if a square contains a 3 and a star, then no other square containing a 3 will also contain a star and no other square with a star will contain a 3.

				
			2	
			4	
				3
	4			

# Arrowword

The answer to each clue should be entered in the direction of the arrow.

# Sudoku

Every row, every column and each of the nine smaller boxes of nine squares should be filled with a different number from 1 to 9 inclusive.

Some numbers are already in place. Can you complete the grid?

	5	2	9					
	6	4	2		1			
3				5				
	3	1	7		8	5	4	
6								3
	9	5	3		2	7	6	
				8				1
			1		5	9	3	
					9	6	8	

Twelve L-shapes like the ones here need to be inserted in the grid and each L has one hole in it.

There are three pieces of each of the four kinds shown here and any piece may be turned or flipped over before being put in the grid. No pieces of the same kind touch, even at a corner.

The pieces fit together so well that you cannot see any spaces between them; only the holes show. Can you tell where the Ls are?

Logic Puzzle

The annual Wheelsville Sports Car race took place last weekend. Can you discover the full name of each driver who finished in the first four, the car he drove and his final position in the race?

- 1 Terry’s car finished one place ahead of the Porsche, which wasn’t driven by Mr Bishop. Terry’s surname is neither Bishop nor Davis.
- 2 Mr Bishop’s car finished more than one place behind the Mercedes.
- 3 The Jaguar finished more than one place ahead of the car driven by Mr Davis. Benjamin (who didn’t drive the Jaguar) wasn’t second in the race and isn’t surnamed Davis.
- 4 Harry’s car finished one place ahead of the Ferrari.
- 5 Keith’s surname isn’t Exbury.

	Surname				Car				Position

- 22 At high volume (4)

Can you fill each square in the bottom line with the correct digit?

Every square in the solution contains only one digit from each of the lettered lines above, although two or more squares in the solution may contain the same digit.

At the end of every row is a score, which shows:

- a the number of digits placed in the correct finishing position on the bottom line, as indicated by a tick; and
- b the number of digits which appear on the bottom line, but in a different position, as indicated by a cross.

SCORE

A	0	4	0	3	X
B	0	2	1	0	X
C	5	0	6	4	✓ X
D	2	6	4	5	X
E	6	5	7	3	X X

## Down

- 1 Male relative (7)
- 2 Made a more or less disguised reference to (7)
- 3 US 'Sunflower' state (6)
- 4 Offshoot of a branch (4)
- 6 Egg white (7)
- 7 Compass point (5)
- 11 Fabric made from the hair of sheep (4)
- 14 Long journey (4)
- 16 European country (7)
- 18 Commercial stoppage (7)
- 19 Merciless usurer in a play by Shakespeare (7)
- 21 Evoke (6)
- 22 Writing material (5)
- 24 Garden of Adam and Eve (4)

The clues to this puzzle appear within the grid. Each blank square should contain a single digit number from 1-9. Every set of numbers across or down has a sum total equal to that of its clue, shown either directly above or directly to the left.

In this puzzle, an amateur coin collector has been out with his metal detector, searching for booty. He didn't have time to dig up all the coins he found, so has made a grid map, showing their locations, in the hope that if he loses the map, at least no-one else will understand it... However, he didn't count on YOU coming across the strange grid (as seen here). Will you be able to discover the correct number of coins and their precise locations?

Those squares containing numbers are empty, but where a number appears in a square, it indicates how many coins are located in the squares (up to a maximum of eight) surrounding the numbered one, touching it at any corner or side. There is only one coin in any individual square.

Place a circle into every square containing a coin.

1									
		1	1		1		2		2
3			0				1	2	
4			0			0			
				0			2		3
						1	3		
0		2	3		2	2			3

- 19 Greek island (5)
- 20 Showing deterioration from age, as with bread for example (5)

## IQ Puzzle

Place all twelve of the pieces into the grid. Any may be rotated or flipped over, but none may touch another, not even diagonally. The numbers outside the grid refer to the number of consecutive black squares; and each block is separated from the others by at least one white square. For instance, '3 2' could refer to a row with none, one or more white squares, then three black squares, then at least one white square, then two more black squares, followed by any number of white squares.

The four men in this puzzle are playing a game of cards and each has three in his hand: one club, one heart and one spade. Can you discover which three cards are in each man's hand? (NB – A=ace, J=jack, Q=queen and K=king; and in the game ace=1, jack=11, queen=12, king=13 and the values of the other cards are as per their numbers.)

- 1 The man with the seven of hearts has a club with the same value as that of the spade in Henry's hand and a spade with a higher value than Henry's.
- 2 The man with the queen of clubs is holding a spade with a value two lower than that of Damian's spade.
- 3 Simon's spade has a higher value than that of his club (which has a higher value than George's club).
- 4 Damian's club has a lower value than that of his spade.
- 5 Simon's heart has a lower value than that of his club.
- 6 Henry's heart has a higher value than George's heart.

- 16 Island in the eastern Mediterranean (6)
- 19 Trunk (5)

The clues to this puzzle appear within the grid. Each blank square should contain a single digit number from 1-9. Every set of numbers across or down has a sum total equal to that of its clue, shown either directly above or directly to the left.

A standard set of twenty-eight dominoes has been laid out as shown.

Can you draw in the edges of them all? The check-box is provided as an aid, so that you can see which dominoes have been located.

0-0	0-1	0-2	0-3	0-4	0-5	0-6

1-1	1-2	1-3	1-4	1-5	1-6	2-2

2-3	2-4	2-5	2-6	3-3	3-4	3-5

3-6	4-4	4-5	4-6	5-5	5-6	6-6

The answer to each clue should be entered in the direction of the arrow.

- 13 Giant associated with Rhodes (8)
- 14 Type of warship (7)
- 17 Upstairs storage space (5)
- 18 Leave out (4)
- 20 Repair a worn hole, especially in a sock (4)

Each of the small squares in the grid below contains either A, B or C. Every row, column and each of the two long diagonals has exactly two of each letter. The information in the clues refers only to the squares in that row or column. To help you solve this problem, we have provided as many clues as we think you will need! Can you tell the letter in each square?

Across

- 1 No two adjacent squares contain the same letter.
- 2 The As are further right than the Bs.
- 3 Each C is next to and right of a B.
- 4 Each B is next to and right of an A.
- 5 The Bs are further right than the As.
- 6 The Bs are next to one another.

Down

- 1 Each C is next to and below an A.
- 2 The Bs are somewhere between the Cs.
- 3 The Bs are lower than the Cs.
- 4 The As are next to one another.
- 5 The As are next to one another.
- 6 The Cs are somewhere between the Bs.

Logic Puzzle

162

On four days last week, Ronnie received an exciting piece of news concerning a friend or relative. How did Ronnie get this news on the days listed in the grid below, from whom and about what?

- 1 Brenda informed Ronnie of her pregnancy, but not via the email, which Ronnie received the day after hearing of his cousin’s university graduation.
- 2 Matthew wrote the letter, but not about a graduation or a new home.
- 3 Tuesday’s news was told to Ronnie in person, but not by Brenda or Jeff. Nor did Brenda’s news come on Friday.

- 18 Woody tropical grass (6)
- 20 Conceited (4)

The blank squares below should be filled with whole numbers between 1 and 40 inclusive, any of which may occur more than once, or not at all.

The numbers in every horizontal row add up to the totals on the right, as do the two long diagonal lines; while those in every vertical column add up to the totals along the bottom.

Can you discover the missing numbers?

								245
31	15		15		7	28	17	168

# Kakuro

The clues to this puzzle appear within the grid. Each blank square should contain a single digit number from 1-9. Every set of numbers across or down has a sum total equal to that of its clue, shown either directly above or directly to the left.

Can you fill each square in the bottom line with the correct digit?

Every square in the solution contains only one digit from each of the lettered lines above, although two or more squares in the solution may contain the same digit.

At the end of every row is a score, which shows:

- a the number of digits placed in the correct finishing position on the bottom line, as indicated by a tick; and
- b the number of digits which appear on the bottom line, but in a different position, as indicated by a cross.

SCORE					
A	5	4	5	0	✓ X X
B	7	3	7	1	X
C	3	4	0	7	✓ X X
D	1	4	7	3	X X
E	6	7	3	0	✓ X

The answer to each clue should be entered in the direction of the arrow.

IQ Puzzle

Each horizontal row and vertical column should contain different shapes and different numbers.

Every square will contain one number and one shape and no combination may be repeated anywhere else in the puzzle; so, for instance, if a square contains a 3 and a star, then no other square containing a 3 will also contain a star and no other square with a star will contain a 3.

The waiter looking after the diners at tables 1-4 was sure he'd remember what was ordered, so didn't bother to write down anything. He managed well for the starters and main courses, but by the time it came to the dessert course, his memory failed and everyone was given something he or she hadn't ordered. At which numbered table did each sit and what did he or she order (and subsequently receive) for the dessert course?

- 1 Desmond had ordered the strawberry sorbet, but had actually started to eat the dessert put in front of him, before it was taken to the right person!
- 2 Gina sat at a table with a number one higher than that of the diner who ordered apple pie, but lower than that taken by the customer who received apple pie.
- 3 The diner who ordered cheesecake sat at a table with a number one lower than that taken by Eileen, who received the chocolate ice cream.

		Table				Ordered				Received

- 22 Sphere (3)

Every row and column in this grid originally contained one circle, one diamond, one square, one triangle and two blank squares, although not necessarily in that order.

Every symbol with a black arrow refers to the first of the four symbols encountered when travelling in the direction of the arrow. Every symbol with a white arrow refers to the second of the four symbols encountered in the direction of the arrow.

Can you complete the original grid?

# Sudoku

208

Every row, every column and each of the nine smaller boxes of nine squares should be filled with a different number from 1 to 9 inclusive.

Some numbers are already in place. Can you complete the grid?

# IQ Puzzle

214

The grid should be filled with numbers from 1 to 6, so that each number appears just once in every row and column. The clues refer to the digit totals in the squares, eg A 1 2 3 = 6 means that the numbers in squares A1, A2 and A3 add up to 6.

1 D E 4 = 11

2 B C 5 = 9

3 C D 6 = 6

4 A 5 6 = 5

5 B 2 3 = 11

6 C 1 2 = 5

7 D 1 2 3 = 7

8 E 5 6 = 8

9 F 3 4 5 = 6

10 E F 1 = 9

11 E F 2 = 7

	A	B	C	D	E	F
1						
2						
3						
4						
5						
6						

The answer to each clue should be entered in the direction of the arrow.

Can you place the vessels into the diagram? Some parts of vessels or sea squares have already been filled in. A number to the right or below a row or column refers to the number of occupied squares in that row or column.

Any vessel may be positioned horizontally or vertically, but no part of a vessel touches part of any other vessel, either horizontally, vertically or diagonally.

Every letter in this crossword has been replaced by a number, the number remaining the same for that letter wherever it occurs in the grid. Can you substitute numbers for letters and thus complete the crossword? It may help to cross off the letters either side of the grid to keep track of progress, and the reference box showing which numbers have been decoded can also aid solving. Three letters have already been entered into the grid, to help you on your way.

- 15 More grubby (7)
- 19 Projecting ridge on a mountain (5)
- 20 Exceed (4)
- 22 Strike (3)

IQ Puzzle

In this puzzle, an amateur coin collector has been out with his metal detector, searching for booty. He didn't have time to dig up all the coins he found, so has made a grid map, showing their locations, in the hope that if he loses the map, at least no-one else will understand it... However, he didn't count on YOU coming across the strange grid (as seen here). Will you be able to discover the correct number of coins and their precise locations?

Those squares containing numbers are empty, but where a number appears in a square, it indicates how many coins are located in the squares (up to a maximum of eight) surrounding the numbered one, touching it at any corner or side. There is only one coin in any individual square.

Place a circle into every square containing a coin.

1			2		2				2

Over the years, the four men in this puzzle have amassed quite a quantity of odd socks, old shirts and torn trousers. No man has the same number of odd socks as either old shirts or torn trousers, nor has he the same number of old shirts as torn trousers, so in every man's case, there are three different quantities. Can you determine who has what?

- 1 The man with nine odd socks has one fewer torn jumper than Tony, who has one more old shirt than the man with six odd socks.
- 2 The man with seven old shirts has one more odd sock than Fred.
- 3 Marty has fewer old shirts than Vernon.

		Odd socks				Old shirts				Torn trousers

## Sudoku

240

Every row, every column and each of the nine smaller boxes of nine squares should be filled with a different number from 1 to 9 inclusive.

Some numbers are already in place. Can you complete the grid?

	5						1	
	8	3	6		9	2	5	
			8	5	2			
	2	9	7		5	4	3	
		8				9		
	7	4	9		3	8	2	
			3	9	4			
	9	5	1		6	3	4	
	3						6	

Codeword

Every letter in this crossword has been replaced by a number, the number remaining the same for that letter wherever it occurs in the grid. Can you substitute numbers for letters and thus complete the crossword? It may help to cross off the letters either side of the grid to keep track of progress, and the reference box showing which numbers have been decoded can also aid solving. Three letters have already been entered into the grid, to help you on your way.

- 19 Strap with a crosspiece on the upper of a shoe (1-3)

Kakuro

The clues to this puzzle appear within the grid. Each blank square should contain a single digit number from 1-9. Every set of numbers across or down has a sum total equal to that of its clue, shown either directly above or directly to the left.

## 250

Place all twelve of the pieces into the grid. Any may be rotated or flipped over, but none may touch another, not even diagonally. The numbers outside the grid refer to the number of consecutive black squares; and each block is separated from the others by at least one white square. For instance, '3 2' could refer to a row with none, one or more white squares, then three black squares, then at least one white square, then two more black squares, followed by any number of white squares.

Arrowword

The answer to each clue should be entered in the direction of the arrow.

At a recent school fair, Jimmy’s four aunts each bought a raffle ticket which won a prize! What was each woman’s ticket number, what was its colour and what prize did it win for her?

- 1 The pink ticket had a number 46 higher than that which won the clock.
- 2 The yellow ticket had a lower number than the white ticket, but a higher number than that which won a prize for Jimmy’s Aunt Andrea.
- 3 The green ticket won a very nice pen for one of the aunts.
- 4 Jimmy’s Aunt Sharon won a glass vase. Her ticket number was lower than that bought by Jimmy’s Aunt Wendy (who didn’t win the cake).

## Sudoku

276

Every row, every column and each of the nine smaller boxes of nine squares should be filled with a different number from 1 to 9 inclusive.

Some numbers are already in place. Can you complete the grid?

5		1		4		9		3
3			6		1			7
1	6						2	4
	5	2				7	8	
4	7						3	9
2			5		7			1
7		6		9		4		8

Every letter in this crossword has been replaced by a number, the number remaining the same for that letter wherever it occurs in the grid. Can you substitute numbers for letters and thus complete the crossword? It may help to cross off the letters either side of the grid to keep track of progress, and the reference box showing which numbers have been decoded can also aid solving. Three letters have already been entered into the grid, to help you on your way.

8				21				6			
				13				11			
34						17					
8			14			11			10		

Each of the small squares in the grid below contains either A, B or C. Every row, column and each of the two long diagonals has exactly two of each letter. The information in the clues refers only to the squares in that row or column. To help you solve this problem, we have provided as many clues as we think you will need! Can you tell the letter in each square?

Across

- 2 The As are further right than the Bs.
- 6 The Bs are somewhere between the As.

Down

- 3 The Cs are somewhere between the As.
- 4 The Cs are next to one another.
- 5 Each B is next to and below a C.

- 20 Elaborate song for a solo voice (4)

Can you fill each square in the bottom line with the correct digit?

Every square in the solution contains only one digit from each of the lettered lines above, although two or more squares in the solution may contain the same digit.

At the end of every row is a score, which shows:

- a the number of digits placed in the correct finishing position on the bottom line, as indicated by a tick; and
- b the number of digits which appear on the bottom line, but in a different position, as indicated by a cross.

As a birthday treat, four children were each taken to the cinema on a different day by one of their relatives. Can you discover when and with whom each child went to the cinema and the type of film he or she chose?

- 1 Ruth went to the cinema two days later than the child (not Mary) who chose the historical drama film.
- 2 The child who was treated by an aunt went to the cinema the day before Patrick.
- 3 The child who was treated by an older brother went to the cinema later in the week than Mary, but earlier in the week than the child who chose the western.
- 4 One child was taken (by an uncle) to see a comedy film earlier in the week than Johnnie’s trip to the cinema.

Codeword

Every letter in this crossword has been replaced by a number, the number remaining the same for that letter wherever it occurs in the grid. Can you substitute numbers for letters and thus complete the crossword? It may help to cross off the letters either side of the grid to keep track of progress, and the reference box showing which numbers have been decoded can also aid solving. Three letters have already been entered into the grid, to help you on your way.

18

The man with 9 nieces and 6 nephews isn't Mr Grainger (clue 4), Mr Venner (clue 1) or Mr Harte (2), so Mr Thorpe. He isn't Patrick (1), Ronnie (2) or Norman (3), so Theo. By elimination, Norman has 7 nieces and 5 nephews (3), so Patrick has 8 nieces and 7 nephews (1), thus Ronnie has 6 nieces and 8 nephews. Patrick is Mr Harte (2). Norman isn't Mr Venner (1), so his surname is Grainger and Ronnie's is Venner.

**Thus (nieces - nephews):**

Norman - Grainger - 7 - 5;

Patrick - Harte - 8 - 7;

Ronnie - Venner - 6 - 8;

Theo - Thorpe - 9 - 6.

C – The middle scrolls do not conform with the others.

54

The person who spent 2½ hours in the library isn't Judy (clue 2), Lionel or Trish (clue 3), so Martin. The one who spent 3 hours in the library isn't Judy (2), so Trish (3) and Lionel was there for 3½ hours. Judy was there for 4 hours, so Trish studied politics. Judy studied coins (2). Martin arrived at 9.00am (3), so he studied butterflies (1) and Lionel arrived at 9.30am and studied flags. Trish arrived at 9.15am (2) and Judy at 8.45am.

**Thus:**

Judy - 8.45am - 4 hours - coins;  
Lionel - 9.30am - 3½ hours - flags;  
Martin - 9.00am - 2½ hours - butterflies;  
Trish - 9.15am - 3 hours - politics.

4	7	8	3	1	9	5	2	6

90

The Mercedes finished either first or second (clue 2), as did the Jaguar (clue 3), thus Mr Bishop drove neither the Mercedes or the Jaguar (2). Mr Bishop didn't drive the Porsche (1), so the Ferrari. By elimination, Mr Davis drove the Porsche (3). Terry is neither Mr Bishop nor Mr Davis (1), so Terry finished second, Mr Davis was third and Mr Bishop was fourth. The Jaguar was first (3). Benjamin wasn't first, second or third (3), so fourth and (4) Harry was third. By elimination, Keith was first and Terry drove the Mercedes. Keith's surname isn't Exbury (5), so Colt, and Terry's is Exbury.

**Thus:**

Benjamin - Bishop - Ferrari - fourth;  
Harry - Davis - Porsche - third;  
Keith - Colt - Jaguar - first;  
Terry - Exbury - Mercedes - second.

# Solutions

124

127

128

A – In each horizontal row, the left hexagon and centre hexagon are superimposed to make the right hexagon.

125

6	3	2	4	9	5	1	7	8
9	7	5	1	2	8	3	6	4
1	8	4	3	7	6	5	2	9
7	5	1	8	6	3	9	4	2
3	2	6	9	4	1	8	5	7
8	4	9	2	5	7	6	3	1

5	6	8	7	1	4	2	9	3

126

The men holding the ace and/or 3 of spades aren't Simon (clue 3) or Damian (clue 4). Henry hasn't the ace of spades (1), so he has the 3 and George has the ace. The man with the 7 of hearts has the 3 of clubs (1) and either the 5 or jack of spades, so isn't George (above). Damian has the 5 of spades (2) and Henry has the queen of clubs. By elimination, Simon has the jack of spades. Damian has the 3 of clubs (3). Simon has the 4 of hearts. Simon has the 7 of clubs (3) and George has the 5 of clubs. Henry has the king of hearts (6) and George has the 9 of hearts.

**Thus (club - heart - spade):**

Damian - 3 - 7 - 5;

George - 5 - 9 - A;

Henry - Q - K - 3;

Simon - 7 - 4 - J.

Brenda's news was her pregnancy (clue 1). Matthew's wasn't about graduation or a new home (clue 2), so his engagement. Matthew wrote the letter (2). Tuesday's news was told in person, but not by Brenda or Jeff (3), so Tina. The email wasn't sent by Brenda or Tina (1), so by Jeff. By elimination, Brenda made the phone call. Jeff's news wasn't of the graduation (1), so a new home, and Tina's was of the graduation. The email came on Wednesday (1). The phone call wasn't made on Friday (3), so Thursday. Friday's news came by letter.

**Thus:**

Tuesday - in person - Tina - graduation;  
 Wednesday - email - Jeff - new home;  
 Thursday - phone call - Brenda - pregnancy;  
 Friday - letter - Matthew - engagement.

Desmond ordered sorbet (clue 1). Eileen didn't order cheesecake (clue 3). Nor, since she received ice cream (3), did she order ice cream. Thus Eileen ordered apple pie. So Gina's table number was one higher than Eileen's (2), thus Gina didn't order cheesecake (3). By elimination, Gina ordered ice cream and Frederick ordered cheesecake. Table 4 wasn't taken by Gina (2), Frederick or Eileen (3 and above), so Desmond. Frederick had table 1, Eileen had table 2 (3) and Gina had table 3 (2). Desmond received apple pie (2). Frederick's order of cheesecake was thus received by Gina. Frederick received the sorbet.

**Thus (ordered - received):**

Desmond - table 4 - sorbet - apple pie;  
Eileen - table 2 - apple pie - ice cream;  
Frederick - table 1 - cheesecake - sorbet;  
Gina - table 3 - ice cream - cheesecake.

7	3	4	8	5	9	6	1	2
2	8	1	7	6	3	5	9	4

234

Remember throughout that each man has three different quantities (intro). Thus the man with 7 old shirts has 10 odd socks (clue 2) and Fred has 9 odd socks. The man with 6 odd socks has 8 old shirts (1) and Tony has 9 old shirts, so (by elimination) Tony also has 7 odd socks and Fred has 5 old shirts. Thus Fred (9 odd socks, above) has 10 torn trousers (1) and Tony has 11 torn trousers. The man with 8 old shirts has 9 torn trousers and the one with 8 torn trousers has 7 old shirts. Marty has 7 old shirts (3) and Vernon has 8 old shirts.

**Thus (socks - shirts - trousers):**

Fred - 9 - 5 - 10;

Marty - 10 - 7 - 8;

Tony - 7 - 9 - 11;

Vernon - 6 - 8 - 9.

# Solutions

268

271

272

1 – The figure is turned 45 degrees clockwise each time the black shaded portion moves first from top to bottom (in the first row) and then from left to right (in the second row).

269

1	7	8	6	9	3	5	2	4
2	6	5	1	8	4	3	7	9
3	9	4	7	2	5	8	1	6
9	5	2	4	1	6	7	8	3
7	1	6	5	3	8	9	4	2
4	8	3	9	7	2	1	6	5
6	4	1	8	5	9	2	3	7
5	3	7	2	4	1	6	9	8
8	2	9	3	6	7	4	5	1

270

Ticket 008 wasn't pink (clue 1), yellow or white (clue 2), so green and (3) won a pen. Ticket 054 wasn't pink (1) or white (2), so yellow and Andrea had 008. Ticket 146 didn't win the clock (1) or the vase (4), so a cake. Wendy didn't win the cake (4), so Sharon who won the vase had ticket 054 and Wendy had ticket 100 and (by elimination) won the clock. Karen had ticket 146 (cake, above). Karen's ticket was pink (1), so Wendy's was white.

**Thus:**

Andrea - 008 - green - pen;  
Karen - 146 - pink - cake;  
Sharon - 054 - yellow - vase;  
Wendy - 100 - white - clock.

The child who went on Monday isn't Ruth (clue 1), Patrick (clue 2) or Johnnie (4), so Mary. Ruth went on Thursday (1). The historical drama was seen on Tuesday (1). The comedy wasn't seen on Wednesday or Thursday (4), so Monday. Ruth was taken by her uncle (4), so the aunt's treat was on Tuesday (2) and Patrick's was on Wednesday. Johnnie was thus taken by his aunt. Ruth wasn't taken by a brother (3), so by her sister, and Patrick went with his brother. Ruth chose the western (4), so the sci-fi film was chosen by Patrick.

**Thus:**

Johnnie - Tuesday - aunt - historical;  
Mary - Monday - uncle - comedy;  
Patrick - Wednesday - brother - sci-fi;  
Ruth - Thursday - sister - western.
